

Infor10 Supply Chain Execution

Reach complete integrated supply chain execution.

It's no longer enough to optimize the performance of each segment—you also have to make your entire supply chain work as a unified whole to reach top performance. Fully integrated supply chain execution technology can give you the power to lead your industry rather than falling behind. In fact, studies show that companies with the most fully integrated supply chain technology invariably rank among the top industry performers in every respect. End-to-end supply chain visibility combined with an efficient execution system can help you make better decisions and execute those decisions faster.

Comprehensive expertise.

Infor™ brings decades of experience to every level of your supply chain operations, to give you complete control and total visibility over every aspect of your business. Our software embodies expertise spanning everything from sourcing to manufacturing to distribution, to help you deal effectively with the challenges you face every day. Our groundbreaking Infor10 technologies add even more power to these proven solutions by making every Infor application instantly ready to connect seamlessly with the systems you use most frequently, so that you can work faster and smarter to get better results every day.

Meet the fully unified supply chain.

Until now, there's been no alternative to fragmented supply chain execution—each phase of the supply chain ran on a different system with limited connections to the other systems—warehouse management systems were separate from transportation management, labor management, and billing systems. As a result, each department had to guess the requirements and constraints of the others before making plans.

Infor10 Supply Chain Execution is the first single execution solution that combines warehouse management, labor management, transportation management, and 3PL billing in a unified solution with a common user interface. It combines and unites all of your supply chain technology into a single, streamlined execution system so that it runs like a single, well-tuned machine, not just a batch of unrelated segments.

By unifying your entire supply chain execution process, you get the power you need to function effectively at any scale, along with the detailed control required to make sure you're operating at maximum efficiency.

Infor10 Supply Chain Execution combines the four most crucial functions of your supply chain:

The first execution solution that combines warehouse management, labor management, transportation management, and 3PL billing in a unified solution.

Warehouse Management.

The Infor10 Supply Chain Execution solution automates and streamlines every facet of warehousing and distribution operations, including:

- Appointment and dock door scheduling
- Receiving
- Storage (putaway)
- Cross-docking
- Order processing
- Carrier rating, routing, optimization, and wave planning
- Picking
- Shipping
- Inventory control

You can also configure Infor10 Supply Chain Execution to support advanced functions such as RF and voice support, system directed forward pick replenishment, multiple date code tracking, serial number tracking and advanced kitting.

Labor management.

You can direct, track, measure, and report on all labor-related activities within your operation with n Infor10 Supply Chain Execution's powerful assortment of tools to drive and monitor labor efficiencies, including:

- Labor planning and forecasting
- Task dispatch strategies to direct and prioritize warehouse work
- Task queue monitoring and management
- Time and attendance, operational activity monitoring, and performance reporting
- Individual and group-level performance tracking versus standards

You can set up individual task management profiles to make the most of your operators' skill sets, thanks to built-in task directed management features in SCE. . You can also dynamically monitor staff performance against engineered labor standards. You can drive operational improvements by setting achievable goals and monitoring performance rather than relying on subjective measurements of performance.

Infor10 Supply Chain Execution:

- Automates and streamlines every facet of logistics
- Improves order processing, routing, and optimization
- Streamlines warehouse labor management
- Delivers a comprehensive view of you operations
- Accelerates transportation network performance
- Combines all aspects of logistics into a single solution
- Lets you make better decisions faster

Our customers frequently achieve dramatic performance improvements through improved warehouse labor management.

Billing.

Third Party Logistics (3PL) firms and people who need to track operating costs by division need the rich, fully integrated 3PL Billing features in SCE. Its powerful features can help you to:

- Simplify management of your billing and invoicing requirements.
- Automate the costing, invoicing, and billing process.
- Centralize billing across multiple facilities.
- Increase billing and invoicing visibility across the enterprise.
- Improve your collection process by reducing days of sales outstanding.
- Get a consolidated view of your company and customers and improve overall customer service.

You'll be able to bill your customers more quickly and accurately and prove your value to management with the built-in reporting features in Infor10 Supply Chain Execution. You'll also be able to get a quick snapshot of your entire operation, any time, so that you always know exactly what to do next and avoid unwanted surprises.

Transportation management.

Over the course of 20 years, Infor has perfected the most powerful transportation planning algorithms anywhere. Those unique processes now drive the robust transportation management features in Supply Chain Execution to help your transportation network achieve unparalleled performance. With shipment carrier tendering, carrier communications, carrier rating, and shipment optimization fully integrated into a world-class warehouse management solution, you get a system that delivers all the power you need in a single, unified application.

The fully configurable transportation management tendering capabilities in SCE help you make the best carrier, tendering, selection, and optimization choices. You can manually assign shipments to specific carriers or automate the entire tendering process with electronic carrier notifications (EDI, email, and web access), or sequential carrier tendering based on pre-defined rules. You'll also have a secure carrier user interface to give your carriers all the information they need to meet your needs.

Tear down the walls.

When you pull your entire supply chain execution operation together and get it operating as a cohesive whole, you'll be in a position to focus on more strategic decisions, rather than staying mired in routine transactions. You'll also gain an instinctive level of insight into the complex tradeoffs that often make the difference between a perfect order and a failed delivery. With Infor10 Supply Chain Execution, you can automate repetitive activities and just manage the exceptions. Along the way, you'll also gain vastly improved performance in the myriad everyday tasks that determine your success as a business and led to operational excellence.

Pull your entire supply chain execution operation together and get it operating as a cohesive whole.

Powered by Innovative Technology

Infor's latest technologies drive our proven applications to new levels of usability, connectivity, and insight. Some of these technologies include:

INFOR10 ION WORKSPACE

A consumer-grade user experience that unifies information from multiple applications and sources on a single screen that can be personalized to the way you work. In-context Business Intelligence ensures that the information most relevant to your decision-making appears on your screen automatically. The fusion of ERP with social media technology allows you to communicate and share information faster and more effectively inside and outside your organization.

INFOR10 ION

The keystone of Infor's technology framework, Infor10 ION delivers enterprise connectivity, process workflow, and event management in one unbreakable architecture. ION simplifies connectivity between your current Infor applications and third party solutions, whether they're on-premises, in the cloud, or both. Embedded workflow helps you control and innovate your business processes across the enterprise and Event Management brings real-time alerts and actions to your desktop, tablet, or phone—so you can keep your finger on the pulse of business and respond immediately. With Infor10 ION, your systems and your people respond faster and with better information.

INFOR10 MOTION

Put the power of your Infor applications on your tablet or smart phone, so that you can be productive on the run. Purpose-built mobile apps, such as Infor10 Road Warrior, provide an easy-to-use way to make your sales force more effective when they're on the go. Another mobile app, Infor10 Activity Deck, instantly alerts you of critical actions in your business and allows you to forward or approve actions with a single click.

REPORTING AND ANALYTICS

Through the Infor10 Business Vault, you'll work smarter and more confidently because all the reports originate from the same, reliable source—even when the information is drawn from several systems across the business. Business Analytics deliver actionable information based on your role and your industry so you get the information you need for your job, the way you want to see it. You will have the power to turn that information into insight with multiple, analytical views on your performance.

About Infor.

Infor is the world's third-largest supplier of enterprise applications and services, helping more than 70,000 large and mid-size companies improve operations and drive growth across numerous industry sectors. To learn more about Infor, please visit www.infor.com.
